SKILLS

- **Programming Languages:** Proficient in Java, Kotlin, PHP, C++, SQL, JavaScript, and Python.
- **Web Development:** Experienced in Laravel, Node.js, WordPress, Bootstrap, HTML, CSS, and Vue.js for building dynamic and responsive web applications.
- **Mobile Development:** Skilled in Android development using Java and Kotlin with MVVM architecture; adept at Firebase integration and app publishing on Google Play Console.
- **API Development & Integration:** Extensive experience in RESTful API development with Laravel and Node.js, utilizing Retrofit for Android and OpenVPN API for VPN functionalities.
- **Cloud & Deployment:** Competent in deploying web projects on AWS, with additional expertise in Apache and Nginx server configurations, version control via Git, and broad familiarity with web hosting platforms for reliable, scalable deployment.
- **Database Management:** Advanced knowledge of both relational databases (MySQL, SQLite) and non-relational databases for optimized and high-performance data storage solutions.
- **Tools & Frameworks:** Proficient in using Google Play Billing API, OpenVPN, Firebase (for analytics and authentication),

SUMMARY

Results-driven Computer Engineer and Full-Stack Developer with a Bachelor's in Information Technology from Iqra University. Proven expertise in designing, developing, and deploying robust web and mobile applications, with hands-on experience in AWS and various web hosting platforms. Skilled in full-stack technologies, including Laravel, Node.js, Java, and Kotlin, to create scalable, user-friendly solutions. Proficient in the complete app lifecycle, from development to publishing on the Google Play Store, ensuring smooth and reliable user experiences. Recognized for strong problem-solving skills, meticulous attention to detail, and the ability to lead projects from concept through deployment.

EXPERIENCE

September 2021 - Current

Senior Android/Full-Stack Developer at Celeritas Solutions

- **Education Platform Development:** Spearheaded the creation of a comprehensive **Education Platform** with three distinct dashboards for **admin**, **teacher**, and **student** users, enabling seamless interaction, content management, and learning support. **Technologies Used:** **Laravel** for back-end development, **Node.js** for API management, **Vue.js** for dynamic front-end interfaces.

Admin Dashboard: Designed for administrators to manage the platform, control user access, and monitor overall system activities. Features include: User management for teachers and students, granting and restricting access as needed. Analytics for monitoring course engagement, content popularity, and overall platform performance. Full access to edit or remove courses and content, ensuring the quality and relevance of educational material.

Teacher Dashboard: Tailored for educators to create and manage courses, engage with students, and track course progress. Key functionalities include: Content creation and course management, enabling teachers to add course materials, assessments, and resources. Interaction tools, such as personal messaging and discussion forums, allowing teachers to communicate directly with students. Analytics on student engagement, helping teachers gauge content effectiveness and adapt their teaching strategies.

Google Cloud, and Git for version control.

- **Design & Prototyping:** Skilled in Adobe Photoshop and Figma for creating intuitive UI/UX designs and prototypes.
- **Additional Skills:** Strong foundation in Object-Oriented Programming, with expertise in debugging, testing, and performance optimization for seamless application functionality.

Student Dashboard: Focused on enhancing the learning experience, providing students with access to course materials, interactive tools, and performance tracking. Features include: Ability to view, like, and comment on course content, creating a more interactive learning environment.

Access to discussion forums and direct messaging for real-time interaction with teachers and peers.

Personal progress tracking, allowing students to monitor their course completion and performance.

Impact: This platform supported over 500 users within the first quarter of launch, improving student engagement through interactive features and providing teachers with valuable insights for content improvement.

- **Admin Panel for Prompt Generation Using ChatGPT-Like LMS:**

Developed an advanced **Admin Panel** leveraging **Laravel** and **Node.js** to provide a Learning Management System (LMS) integrated with AI-driven prompt generation, tailored for clinic registration and management. **Technologies Used:** **Laravel** for back-end management, **Node.js** for API integrations, **JavaScript (React)** for the front-end interface.

User Registration & Clinic Association: Designed a registration module for users to associate their accounts with specific clinics. This allowed seamless onboarding with clinic-based access control.

Prompt Generation Tools: Created a set of tools enabling users to interact with AI-powered prompts similar to ChatGPT. Users can input necessary information, and the system generates customized responses based on prompt settings. Tools include templates for various medical or informational prompts tailored to each clinic's requirements.

Enabled secure form handling for user-submitted data, which the system then processes to generate accurate, context-sensitive responses.

Impact: This innovative feature streamlined interactions and provided clinics with AI-based support for automating responses, significantly improving user satisfaction and engagement.

- **VPN App Development for Android:** Designed and deployed secure, feature-rich VPN applications for Android, offering reliable private internet access to a broad user base. **Technologies Used:** **Kotlin**, **Java**, **OpenVPN API**, **Retrofit** for network operations, **MVVM architecture**, **Firebase** for authentication and analytics, **Google Play Billing API**.

Core Features: Protocol Integration: Configured secure protocols like OpenVPN and IKEv2, ensuring high standards of data encryption and privacy for users.

Server Management & Optimization: Developed features for real-time server selection and optimized connections, reducing latency and improving connection stability.

Subscription Management: Integrated with Google Play Billing for streamlined subscription processing, allowing users to easily upgrade or manage VPN subscriptions.

Impact: Enhanced security and usability resulted in a 30% growth in active users and a 15% improvement in connection speeds through optimized server management.

- **Admin Dashboard for VPN Management:** Constructed a comprehensive web-based admin dashboard to monitor VPN application metrics, manage subscriptions, and ensure service reliability. **Technologies Used:** **Laravel** for back-end, **Vue.js** for

front-end visualization, and **Firestore** for real-time updates.

Core Functionalities:
Server Monitoring Tools: Enabled real-time oversight of server health, load, and uptime, allowing swift responses to any service issues.

Data Visualization: Developed analytics dashboards displaying user activity trends, session data, and server performance.

Notification System: Automated alerts for administrators in case of server downtime or performance drops.

Impact: Improved operational efficiency and reduced server issue response time, ensuring a stable and high-quality service for users.

December 2018 - December 2019

Php Developer at Cryptically Developers | Karachi

- **Project Design & Development:** Led end-to-end development of custom WordPress and HTML/CSS websites for various clients. Notably contributed to user experience design and optimization for responsive layouts.**Technologies Used:** WordPress, HTML, CSS, Bootstrap, JavaScript
- **Rent-A-Car Website:** Developed a custom Rent-A-Car platform to facilitate vehicle reservations and customer management. Integrated an intuitive booking interface, resulting in a user-friendly experience for clients.
Responsibilities: Collaborated with clients to gather and understand project requirements.
Implemented dynamic features using **JavaScript** and enhanced UI responsiveness with **Bootstrap**.
Managed database configuration to ensure smooth transaction handling and data retrieval.
Impact: Successfully delivered a robust, user-friendly rental platform, receiving positive feedback for its ease of use and design.
- **Builder Website Deployment:** Oversaw the deployment of a comprehensive builder's website on WordPress, integrating SEO practices to enhance online visibility.
Responsibilities: Customized WordPress themes and plugins for functional and aesthetic alignment with client requirements.
Enhanced SEO by optimizing site structure, meta tags, and on-page content.
Impact: The site ranked highly in local search results, leading to increased client inquiries and engagement.
